Bait Shuttle Cleared for Takeoff

Safety, delivering bait, and fun. That is what the Bait Shuttle System is all about. Simply attach to your line (instructions enclosed) and insert weight and baited hook

The Bait Shuttle bait delivery systems.

inside The Shuttle. No sharp hook dangling before you cast. Especially safe for kids, but all anglers who have experienced being hooked or hooking someone or some thing. Cast and The Shuttle flies through the air as a projectile, splashes down, rights itself, and safely dispenses weight, and bait into the water INTACT without ever being thrown off during casts. Then it becomes a bobber in bright colors. Fishing at night? No problem, insert a Glow-Stix on top for night time fishing up to 6 hours before replacing. Want to fish on the bottom instead of using a bobber? Use the Sinker model. Does exactly the same thing as the bobber, except upon splashdown and dispensing of bait safely it slowly sinks along with bait to the bottom. Great for things like catfishing. The Bait Shuttle System, because of it's design, also allows for much further and accurate casts. Coming to a store near you soon. If they don't have it contact the store manager. Remember, The Bait Shuttle System makes fishing safe for kids and bigger kids, and it delivers your bait intact. For further information see us at www.thebaitshuttle.com.
